

# High-throughput COVID-19 diagnostics

## Optimised ELISA kit format for EUROLabWorkstation ELISA

- ✓ **Efficient high-throughput analysis** with 20 ELISA plates per kit and sufficient quantities of all reagents required for test processing
- ✓ **Convenient and fast handling** due to pre-filled and labelled EURO Tanks for sample buffer, enzyme conjugate, chromogen/substrate and stop solutions
- ✓ **High flexibility** owing to optional parallel processing of both available formats

### Currently available EUROIMMUN ELISAs for COVID-19 diagnostics

Product name	Order numbers	
	Standard format (1 ELISA plate / kit)	Format optimised for the EUROLabWorkstation ELISA (20 ELISA plates / kit)
Anti-SARS-CoV-2 ELISA (IgA)	EI 2606-9601 A	EI 2606-9620 A
Anti-SARS-CoV-2 ELISA (IgG)	EI 2606-9601 G	EI 2606-9620 G
Anti-SARS-CoV-2 NCP ELISA (IgG)	EI 2606-9601-2 G	EI 2606-9620-2 G
